DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-8 and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Vegliante et al (2002/0117038A1), hereafter Vegliante. Vegliante discloses guide rail 12, 14; sliding cutter 18, 22; blade 22; attractive layer made of polymeric material in paragraph [0029]; arched saddle 26; adhesive piece 104; attractive layer is PVC in paragraph [0029]; extrusion process in paragraph [0031]; sliding portion 29; channel 11.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vegliante in view of Union et al (4,210,043), hereafter Union. Vegliante discloses everything as noted above, but does not disclose a T-shaped channel and sliding portion. However, Union teaches T-shaped channel 28 and sliding portion 42. It would have been obvious to provide a T-shaped channel and sliding portion in Vegliante as taught by Union in order to prevent rotation of the sliding portion in the channel.
